

The program approach suggests that the best way to prevent children and young people's involvement in risky behavior is to help them achieve their full potential.

1. How to counteract the negative effects of today's mass media
2. How to have a personal relationship with God
3. Formation of individual character
4. To strengthen emotional ties and important affective relationships
5. To improve communication skills, both individual and within the group
6. Conflict resolution, both individual and within the group

Through workshops, open forums and the different programs that have been developed, we consistently integrate the teachings of the Word of God for all of life into their educational programs. This commitment arises from a profound desire, that God's words will influence the hearts and minds with spiritual guidance and character building. Laura Vicuña Rehabilitation Center provides assistance to establish or strengthen community-based achievement programs that address the immediate needs. Such as education, food, clothing, counseling, and referrals for health care. These programs seek to reunite children and young people to their families whenever possible, or locate appropriate alternative placements.

**Grace A., (17) -center- is one of the several young leaders that participate in these programs & other related activities. Her help is very valuable as the children and youth feel very close to her, and love her very much as a friend and counselor - that personal touch!**
